

**Friday 31st July
& Saturday 1st
August**

Gladstone ECTA Presents

Sue Southey-

Early Childhood Music Consultant

And

Jill Kearney-

Science Guru

Workshops A & B

We have all enjoyed Sue's past CD's and workshops ("Crackle & Pop" and "Knock, Knock") well now it's time to engage in some new music with "Forest Friends."

Forest Friends Fun: Engaging Creativity

This workshop uses new and familiar songs to engage children in achievable and enjoyable music activities. A multi sensory learning approach is used to build skills that enable children to create their own responses to songs using a variety of commercial and home made resources

About our Presenter:

Sue Southey is co-director, and PrePrep teacher in a C&K community kindergarten in Springwood. She is also a trainer and early childhood consultant for the Forte Music Group, a franchise organisation in music education throughout Australia, and overseas.

In her role at Forte she worked as part of a multidisciplinary team to develop Jungle Music, an early childhood music programme for parents and children. As a trainer she works with early childhood music teachers to enable them to deliver high quality music programmes.

Sue is a regular presenter of music workshops at seminars, conferences and teacher's meetings in Brisbane, regional areas of Queensland and Melbourne.

Workshop C

Eureka's! Beakers and Seekers: Science Excitement and Experiments for Explorers aged 4-8.

This session will illustrate many ideas for Lower School, Kindy & Prep science corners, displays, resources and handouts. There will also be some documented class investigations and lots of hands-on, easy, practical WOW factor experiments and engaging demonstrations:

- Balance butterflies, lift off rockets or grow boils.
- Grow exquisite, scintillating crystals.
- Watch cute tadpoles transform into gruesome toads or shining frogs.
- Make a hovercraft, a stealth bomber or a heat rotor.
- See coloured ice boats sail away into multi-coloured waters.
- Marvel at zappy lightning balls, soap-powered fish, fizzy rockets, rubber bones, explosive volcanoes, wind power, catapult planes, coloured fingerprints, magic beanstalks, expanding lizards, sausage sunburn, Cartesian divers, tell-tale lips, blooming floating flowers, many more.

DISCOVER! EUREKA!

About our Presenter:

Jill Kearney has a Medical Science degree and also an Arts degree in English Literature and Ancient History. She has worked in hospital laboratories, public relations and is a published children's picture book author. Jill is now a teacher aide at Gympie South where she is delighted her multidisciplinary perspective can encourage young children in their experience of the excitement and fun of science and the wonders of the world around them.
