

ECTA Cairns Regional Group
Invites
All Early Childhood Professionals
to

“Feeling BOXED In”?

**Come and learn how to teach engineering in the early years using
cardboard boxes!**

We will discuss the Engineering Design Process and
consider some basic engineering construction principles – with hands-on examples.

We will then apply what we have discussed and considered
as we create with hands-on examples.

Cardboard is a fantastic engineering material for young children to work with!
